

# Trimlign™

ORTHO-AUTOMATION

For clinics and labs who are **focused on growth**, Trimlign provides the machine and software to **improve profitability, scalability, employee safety** and **employee satisfaction** by producing quality aligners through automation.

- **Improve consistency**, predictability and outcome of every trimmed aligner and retainer
- Curtail workplace injury and **eliminate hand fatigue** caused by manual trimming
- **Reduce overhead costs**, potentially saving hundreds of work hours annually
- Improve patient comfort by producing a **consistent high-quality** aligner/retainer
- Open architecture system allows you to **work with your preferred software**
- **No per scan, monthly or annual fees** makes Trimlign affordable

**Automatic trimming with the Trimlign machine is fast and easy!**

## Why not just hand trim aligners?

Aside from expensive labor and safety concerns, hand trimming also requires more workspace and produces inconsistent results. **Hand trimming is the bottleneck to scaling your aligner production!**

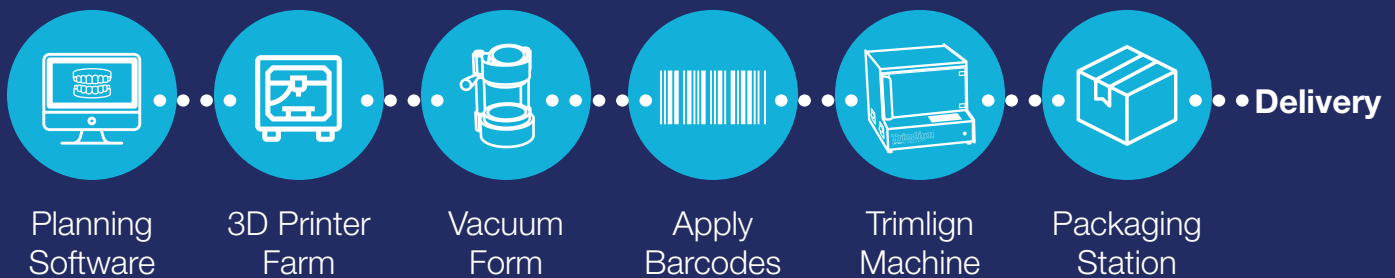

## Economics of hand-trimming versus Trimlign

\*SCENARIO: 50% SCALLOP CUTS, 50% STRAIGHT CUTS, 24 ALIGNERS PER PATIENT CASE

	COST PER ALIGNER	MAX PATIENT CASES PER DAY	MAX ALIGNERS PER DAY	MAX ALIGNERS PER YEAR	SAVINGS PER YEAR
 <b>ONE EMPLOYEE TRIMMING WITH HAND TOOLS</b>	\$1.06	8	192	49,920	\$0
 <b>ONE EMPLOYEE TRIMMING WITH ONE TRIMLIGN MACHINE</b>	\$0.22	19	456	118,560	\$101,587
 <b>ONE EMPLOYEE TRIMMING WITH THREE TRIMLIGN MACHINES</b>	\$0.14	55	1,320	343,200	\$315,820

It would take **seven full time employees** to match the aligner production of **one employee operating three Trimlign machines!**

## Trimlign provides continuous high-volume workflow!

**Contact us today to find out how Trimlign can help you scale your aligner production business and save money at the same time!**
