

Focus Ultra

Explore Infinite Possibilities

Curing Box Ultra Cure

Focus Ultra

Flashforge Next-Gen High-Precision 3D Printing Full-Process Solution

Aid Experts in Unlocking Endless Potential in 3D Printing

Compatible with global scanners
MEDIT, 3shape, Sirona, iTero, etc.

Twin Tornado Wash Station

Surgical Guides Orthodontic Models Complete Dentures

High-Performance Hardware System

Ensure Precision, Quality, and Details for Every Print

Focus Ultra, a professional 3D printer, offers large format, high quality, and efficient stable production. It meets dental needs like implant, restoration, and orthodontics, facilitating digital transformation of dental clinics and denture processing factories.

Enhanced Industrial Linear Module

Ensure accurate Z-axis positioning during printing

Drip-Proof Build Plate

Cleaner printing experience

197*122mm

Enlarged print area; all-aluminum build plate

Newly Upgraded Resin Tank Pin

One-second disassembly

One-Touch Locking

Easy disassembly & quick assembly; more stable build plate

9.25" 6K HD Monochrome Screen

33μm pixel size, showcasing every detail

COB Integrated Light Source

Fresnel lens for even illumination

7" Touch Screen

Convenient and responsive operation

Crown Restoration

Surgical Guide

Orthodontic Model

Meet High-Precision Dental Printing Needs

Focus Ultra supports various applications, including dental crowns, surgical guides, orthodontic models, denture frameworks, and gingiva masks, facilitating digital transformation in dentistry.

Splint/Nightguard

Orthodontic Bracket Tray

Denture Framework

Gingiva Mask

COB light source with mask algorithm provides better control over light distribution, ensuring uniform illumination. New experience with further improved light uniformity.

VS

6K 6K Screen Showcase finer details

Industrial-grade 6K monochrome screen with a resolution of up to **5760*3600**, pixel size of **33μm**; Precisely capture details and maximize design reproduction.

Precision Z-axis Control Motion System

Upgraded industrial linear module & high-power motor offer enhanced structure stability; Minimize errors caused by mechanical vibrations and improve the print success rate.

FlashReady

Newly Upgraded Professional Slicing Software

Open 3D printing solution, with Engineer Mode added, offering easy compatibility with third-party resins for experts

FlashReady

Support various file formats such as stl, frss, frp, fdp, featuring easy one-click operation

Focus Ultra

Parameter

Equipment Name	Focus Ultra
Print Speed	10~50mm/h
Build Volume	197*122*180mm
Layer Thickness	25~200μm
XY Resolution	33μm
Wavelength	405nm
Z-axis	Industrial-grade high-precision guide rail module
Projection Screen	9.25-inch industrial-grade 6K monochrome screen
Input Voltage	100~240V
Resin Tank Capacity	0.45L
Connectivity	USB/Ethernet/Wi-Fi
Power	350W
Dimensions	390*330*525mm
Display Screen	7-inch touch screen
Build Plate	Sandblasted platform
